JAN 2022

FULL-STACK WEB DEVELOPMENT CERTIFICATE, DEVCODECAMP

Navigated an accelerated course for proficiency of the MERN full stack set of skills. Dedicated over 350 hours to learning developer languages and technologies and cultivated problem-solving skills.

SKILLS

Languages and Technologies:

- SAP
- ABAP
- Master Data Governance
- SQL
- Data Services and Migration
- Java
- IntelliJ
- Visual Studio Code
- MongoDB
- Mongoose Schemas
- Express
- React
- Node
- JavaScript
- CSS
- HTML
- Postman
- Axios

OTHER ACTIVITIES

Within the last year, I was a lead mentor for the Hour of Code organization. This organization focuses on inspiring young people to learn about coding and development by hosting "HoC" sessions at any level of grade school. As a lead mentor, I built the PowerPoint deck, designed and conducted the presentations, coordinated with the POCs at the respective schools, staffed the events, and led other volunteers in running the sessions. During my time as a lead mentor, I ran 14 sessions and mentored approximately 370 students. During this time, I demonstrated my ability to take charge of, and own, my work while delivering a solution that benefited all stakeholders. I immensely enjoyed this experience, as I am passionate about investing mental and emotional support for the next generations in hopes of building a better tomorrow.
